3. Method of expediting zoning amendments.
 - a. Method 1 - As presently described in code.

Petition to amend code for permitting the Special Use in general in a particular Zone, then the petitioner returns a second time for the Special Use permit in their specific location within that zoning classification.
 - b. Method 2 - Petitioner goes before ZBA to amend the code for the general Special Use and on the same evening petitions for the specific Special Use in their location within that zoning classification.

*In either case, the ZBA can recommend and the Council can add restrictions. If the code is not amended to
